

# Barbershop project template for Dorico

---

## What's included

- This very important read me file
- Barbershop.dorico – the project template.

## Project Template

The default Dorico barbershop quartet template has four players for Tenor, Lead, Baritone and Bass.

This template has just two staves, the first labelled Tenor and Lead and the second Baritone and Bass. You can then use voices to enter notes for each instrument in short score style.

The bar numbers have also been edited to be above every bar line and regular style as per the Barbershop Harmony Society guidelines.

## Change title and other project details

To add your title, composer etc please use **File > Project Info**, or as the template says, press **Ctrl/Cmd-i** to add Project Title etc.

## Playback

The playback currently uses choral samples. If you are aware of a VST instrument suitable for this style, please let me know.

## Save as Project Template

If you then use the **File > Save as Project Template** the template will then appear in the Steinberg Hub on your computer as well as the **File > New from Project Template** menu.

## Issues or Errors

If you find any issues with this Dorico template or would like to suggest changes or tweaks to it, please email [discoverdorico@steinberg.de](mailto:discoverdorico@steinberg.de)
