

# Garritan Personal Orchestra 5 for Dorico

---

This playback template was created from the fantastic work that Ben Bryam-Wigfield did on the expression maps – thank you Ben!

## What's included

- This very important read me file
- GPO5.dorico\_pt – the playback template.

You need to have already installed Dorico 5 (or later) and GPO5 in ARIA Player v1.872 with ARIA Engine v1.967 (or later)

## Playback Template

First, import the playback template (**GPO5.dorico\_pt**) by dragging and dropping the file on to the Dorico hub.

Alternatively, open any Dorico project and use **Play > Playback Templates...** and then the **Import...** button.

In any of your Dorico projects you can now use the GPO5 sounds by applying the playback template from the **Play > Playback Templates...** dialog.

## Default Playback Template

To make this playback template the default for all new Dorico projects you start on your computer go to **Preferences > Play** and set the Default playback template.

## Loading Instruments

When you add an instrument to the score or apply the playback template to an existing file the patches and expression/percussion maps will be loaded automatically for each instrument if that instrument exists in the GPO5 library. If it doesn't, no instrument sound/patch will be loaded – see [Fallbacks for other instruments](#)

## Fallbacks for other instruments

If you wish to use this library in conjunction with another library such as the default HALion instruments provided with Dorico you can duplicate the Playback Template and add e.g. the Dorico default factory template as a fallback option (Iconica Sketch, HSO, HALion Sonic Sel., Olympus, GASE). Any instruments not available in this library will then load automatically in HALion. See [this video](#) for more information.

## Issues or Errors

If you find any issues with the Dorico template or playback template or would like to suggest changes or tweaks to it, please email [discoverdorico@steinberg.de](mailto:discoverdorico@steinberg.de)

## FAQs and Troubleshooting

Currently, there are no percussion instruments mapped in this playback template. See the Fallbacks section and add e.g. the Dorico default sounds or another purchased library such as NotePerformer.

## Changes

### 24<sup>th</sup> October 2024

Template 'updated' to work across Mac and PC with the earlier v1.967 ARIA Engine.

Some extra instruments were mapped including handbells.
