Changing Dorico's note input shortcuts

1. To change the arrow keys, in **Edit** > **Preferences** > **Key Commands** (Windows), **Preferences** > **Key Commands** (Mac) search for **Shadow Note**

Then e.g. set
- Raise Shadow Note by Step to **Up arrow**
- Lower Shadow Note by Step to **Down arrow**

And optionally
- Raise Shadow Note by Octave to **Ctrl**-**Up arrow** / **Cmd**-**Up arrow**
- Lower Shadow Note by Octave to **Ctrl**-**Down arrow** / **Cmd**-**Down arrow**

2. Then search for **Move Up** and **Move Down** in the Note Input section and e.g. set to **Alt-Up** arrow (and **Alt-down**) so that you can still navigate and move the caret to other staves for note input.

3. You can also search for **set note duration** and change the shortcuts for those if you have Finale muscle-memory, but it will make Dorico less intuitive.
