

Auto + Choirs play piano for Dorico

What's included

- This very important read me file
- Auto + choirs play piano.dorico_pt – the playback template.

You'll need to have already installed Dorico 6 and the sound content, including the Etude piano.

Playback Template

First, import the playback template by dragging and dropping the file on to the Dorico hub.

Alternatively, open any Dorico project and use **Play > Playback Template...** and then the **Import...** button.

To use the playback template you can then select the template and press Apply and Close. Dorico will then work through all the instruments in your project and for any of the singers it will load a new instance of HALion with the Etude piano, and use the default Dorico sounds for all other instruments as normal.

Issues or Errors

If you find any issues with the playback template or would like to suggest changes or tweaks to it, please email discoverdorico@steinberg.de
